ABOUT US

GlobalSign is an identity services company providing cloud and on-premise IAM and PKI solutions for enterprises needing to conduct safe commerce, communications, content delivery and community interactions.

- Over 5000 Global partners
- Over 30 000 Customers
- 300 000 Companies use our IAM technology each month
- Over 10 years of experience in Identity and Access Management

AGENDA

SEEKING THE RIGHT PARTNERSHIP(S)

Mobile Network Operators and online service providers finding each other

A PROPOSAL YOU CAN'T REFUSE

What will be the proposal for the online service provider that is too good to pass

GROWING TOGETHER

Mobile Connect and identity and access management can provide growth paths for both the mobile network operator and the online service provider

MOBILE PKI

From the early days of Mobile PKI in 2007. Native ETSI MSS support

KATSO

e-Government identity & authorization management portal. 104 connected online services

STANDARDS

GlobalSign IAM Team has been participating in the standardization of IAM protocols for years

FEDERATION

Our technology is used in large scale federation networks linking dozens or hundreds of organizations

WE'VE BEEN THERE

CHICKEN & EGG - IS THIS A PROBLEM?

Mobile Network Operators have the opportunity to remove the biggest obstacle in Service Provider onboarding – the customers. With millions of subscribers and potential Mobile Connect users the MNO is well positioned to offer convenient user authentication to online services

Connecting you

Mobile Connect is a secure way to log into websites and applications, without having to remember multiple usernames and passwords.

To use Mobile Connect you need to be directed to your mobile network. Just enter your mobile number below to continue.

Mobile number (including country code)

+44

Next

THIS IS IT - TRULY GLOBAL

Mobile Connect is a federated protocol, so no matter where you are or which service you are using, the experience at the service provider is always the same. All you have to remember is your phone number – and have a mobile device

CHANGE RESISTANCE - NEW TECH?

Online service providers already have selected their technologies. Adding new, and sometimes viewed as critical, technology causes change resistance – MNOs need to make the integration as easy as possible for the service provider – preferably without adding complexity

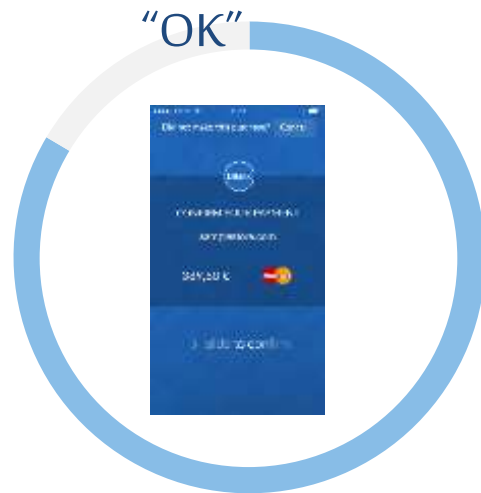

FACT OF LIFE - MULTIPLE STANDARDS

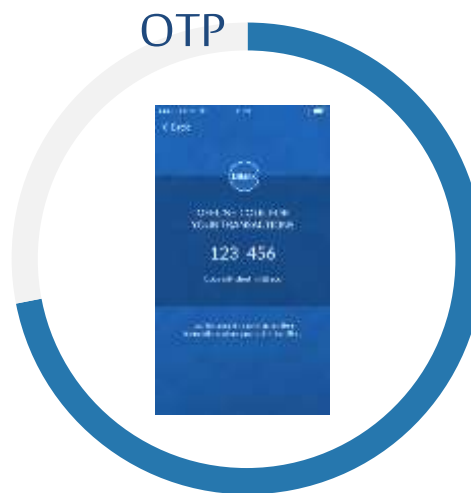

For implementing mobile phone authentication there are multiple standards you can pick up. But the online services can also utilize different standards for external authentication.

LEVEL OF ASSURANCE

Authentication is based on the presence of the token (mobile device). Swipe, click ok etc...

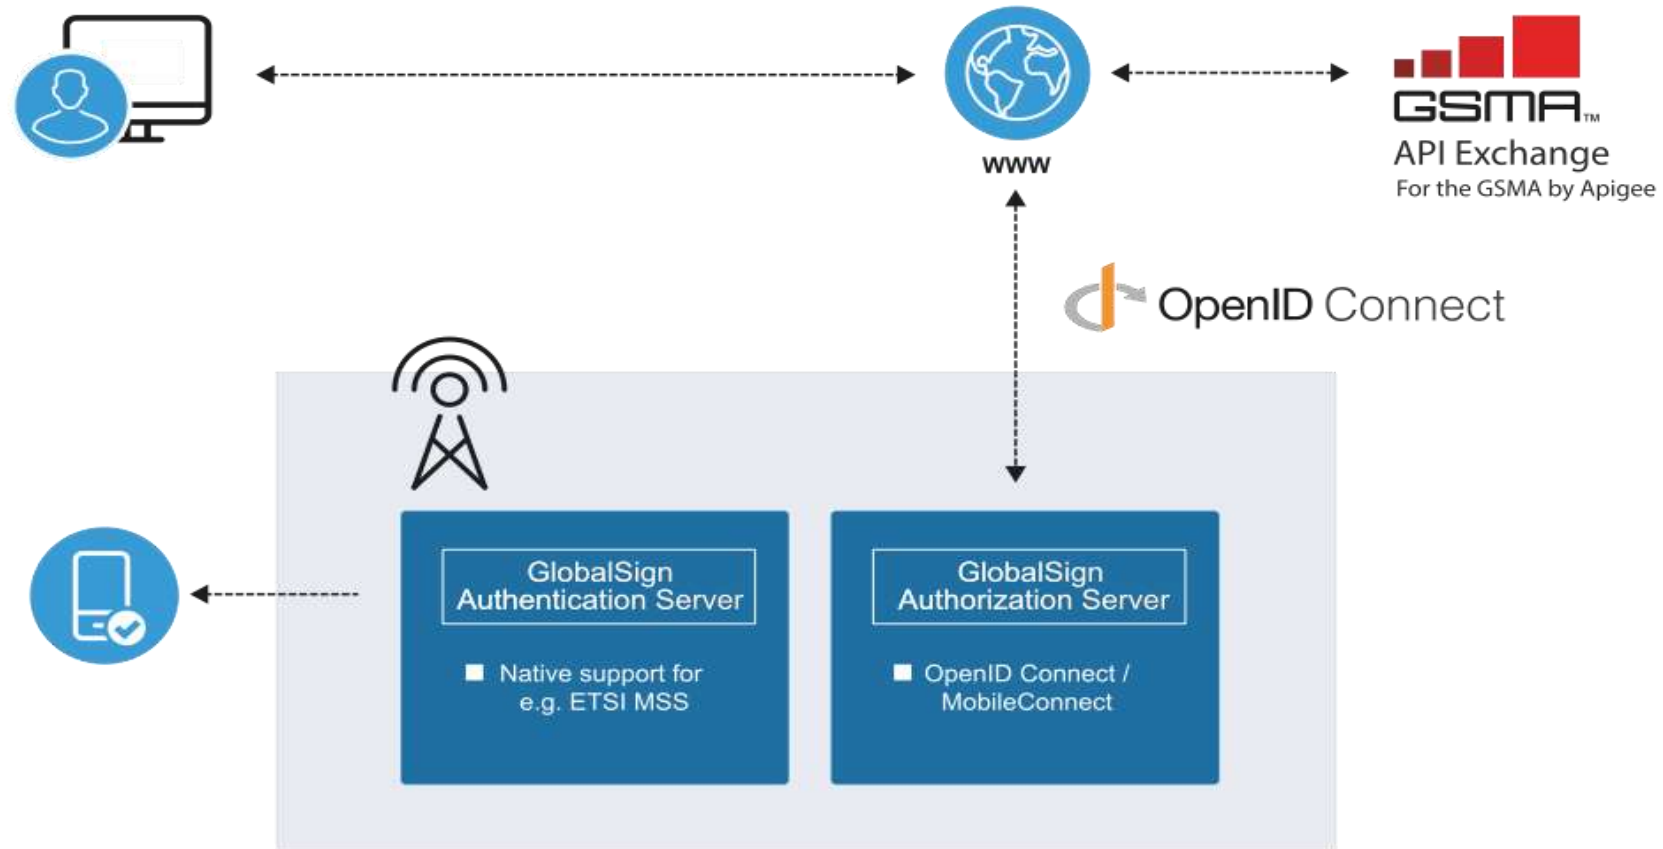

One-time-passwords as an SMS message, mobile generated (offline), list etc...

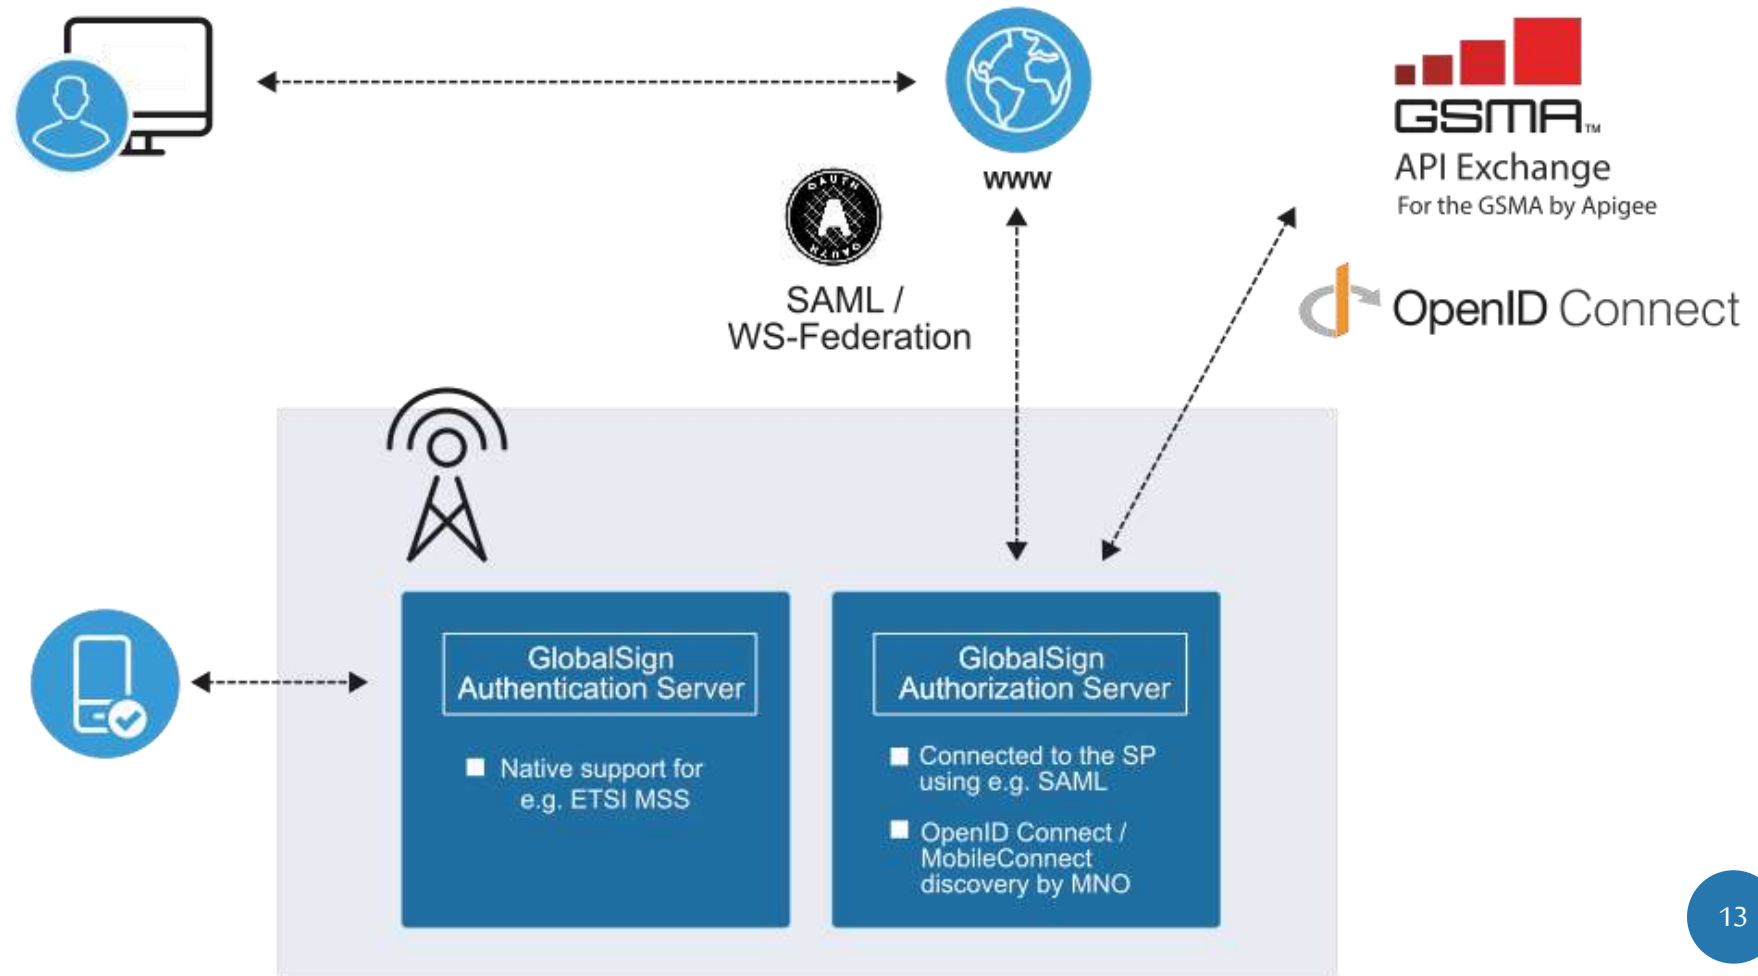

PKI, biometrics, multi-factor methods

OPPORTUNITY

BENEFITS

IT'S EASY

Solutions such as GlobalSign IAM can enable Mobile Connect in a matter of weeks (we've done it)

USERS LOVE IT

No more passwords. No more tokens. One identity – multiple services. Increase loyalty.

GROWTH

Reduced churn and acquire new business customers from online service providers. New business opportunities.

IT'S EASY

Multiple standards are available to integrate the online services to Mobile Connect

USERS LOVE IT

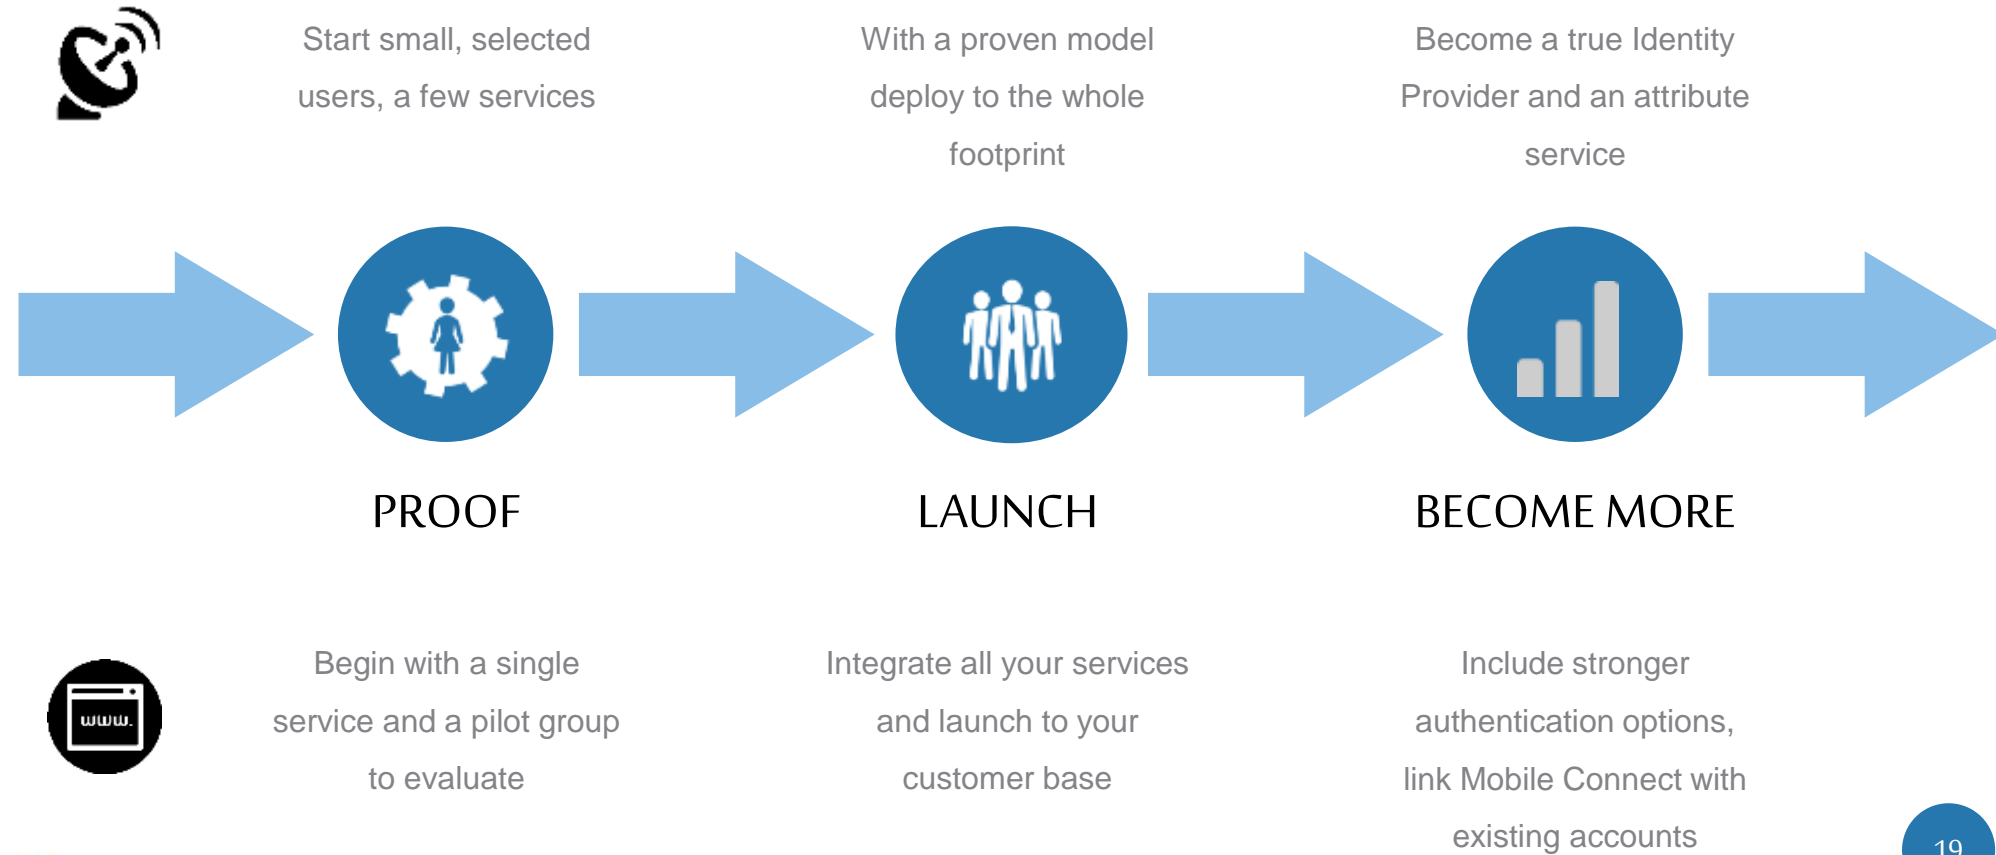

No more passwords. No more tokens. One identity – all your services and partner networks. Increase CX

GROWTH

For the service providers new business and consumer customers through the operator subscribers, easier conversion

THE RIGHT WAY

BUSINESS MODEL

SERVICES

Subscription model for
online service
providers

Monthly /
Per user /
Per transaction /
Free

ATTRIBUTES

Online service
providers can query
additional attributes
about a user.

LOA

Stronger
authentication, step-
up, and confirmation
with LOA3 and LOA4

CLEAR

Transparent and clear
pricing models for
online service
providers

AND THEY LIVED HAPPILY EVER AFTER

MUTUALLY BENEFICIAL

Both the mobile network operator and the online service provider will benefit from the relationship

COMPETITIVE EDGE

Ease of use, security, convenience and overall smooth customer experience will give you a competitive edge

GROWTH

It's not just authentication. Mobile Connect will help you better know your customers. Single identity can create new business opportunities, increase conversion and reduce churn.

THANK YOU
