

Connecting Identity.  
Transforming Digital Business.

# Identity as a Service (IDaaS)

Simple, fast to market Single Sign-On (SSO)  
for Customers/Consumers and B2B Partners

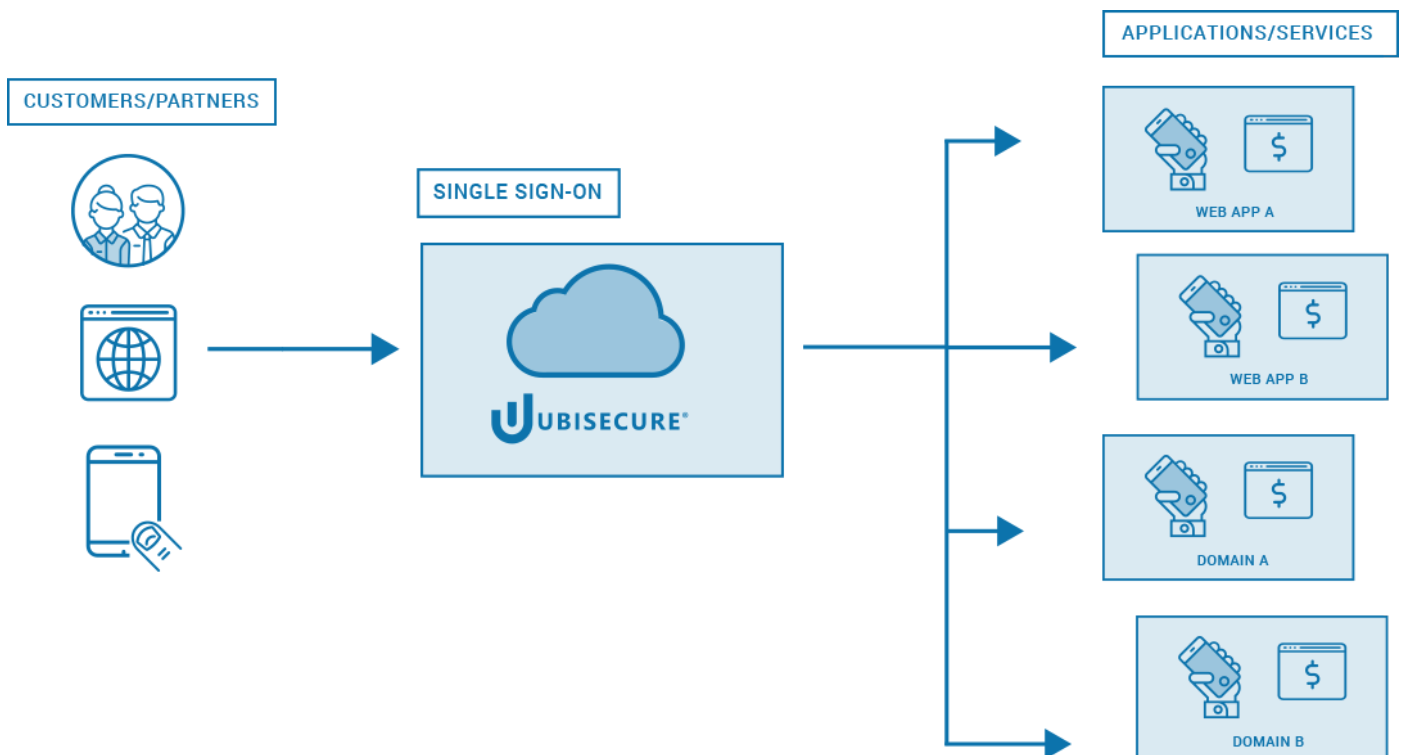

# Identity as a Service (IDaaS) from Ubisecure

IDaaS is a simple, quick to market identity as a service solution, built on the Ubisecure Identity Platform and deployed to the cloud by Ubisecure. It is designed for customer/consumer and B2B Single Sign-On (SSO) and more complex Identity & Access Management (IAM) use cases. Because the enterprise does not need to manage the deployment, security, configuration and maintenance of the solution, IDaaS is ideal for SMBs needing to build core SSO services into applications quickly and easily.

Ubisecure has a long history of deploying its Identity Platform to the cloud for organisations requiring IAM as a SaaS solution. IDaaS builds on this legacy and provides a highly optimised, fast to deploy SaaS offering for core SSO functionality. Optional add-ons extend the core service for custom business requirements or deeper IAM functionality.

## THE BASICS

- Deliver the core functionality needed to add SSO to customer or B2B partner facing applications
- Allow users to sign in only once across multiple applications and resources
- API first, empower developers to build SSO functionality into their own applications and user experience

## BENEFITS

---

- Reduce identity management TCO – enjoy the benefits of the SaaS business model with pay-as-you-grow
- Reduce operational risk – fully managed with high availability, no need to run and manage the technology stack locally in the enterprise
- Focus on your own business - get your application to market faster, provide a better user experience, go live in just weeks

## IDAAS PRODUCT DETAILS

---

### — CORE

- Integrate up to 4 authentication sources (IdP), max 2 internal (AD), max 2 external (WS-Federation, SAML, OIDC, OAuth), and unlimited social identity authentication sources (Facebook, Google etc.)
- Provide for up to 4 standards-based application integrations

## About Ubisecure

Ubisecure is a pioneering European b2b and b2c Customer Identity & Access Management (CIAM) software provider and cloud identity services enabler dedicated to helping its customers realise the true potential of digital business. Ubisecure provides a powerful Identity Platform to connect customer digital identities with customer-facing SaaS and enterprise applications in the cloud and on-premise. The platform consists of productised CIAM middleware and API tooling to help connect and enrich strong identity profiles; manage identity usage, authorisation and progressive authentication policies; secure and consolidate identity, privacy and consent data; and streamline identity based workflows and decision delegations. Uniquely, Ubisecure's Identity Platform connects digital services and Identity Providers, such as social networks, mobile networks, banks and governments, to allow Service Providers to use rich, verified identities to create frictionless login, registration and customer engagement while improving privacy and consent around personal data sharing to meet requirements such as GDPR and PSD2.

Ubisecure is accredited by the Global Legal Entity Identifier Foundation (GLEIF) to issue Legal Entity Identifiers (LEI) under its RapidLEI brand, a cloud-based service that automates the LEI lifecycle to deliver LEIs quickly and easily. The company has offices in London and Finland.
